	Examiner Michael P. Stafira	Art Unit 2877	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 47 are rejected under 35 U.S.C. 102(b) as being anticipated by Eismann ('899).

Claim 1

Eismann ('899) discloses a collection lens (See Fig. 5) disposed so that light traveling from the object (Fig. 5, Ref. 101) passes through the collection lens (See Fig. 5) and travels along a collection path, said collection lens (See Fig. 5) substantially collimating light (See Fig. 5) from the object (Fig. 5, Ref. 101); an imaging lens (See Fig. 5) disposed in the collection path to receive light that has passed through the collection lens (See Fig. 5), producing focused light (See Fig. 5) that is directed along an imaging path; and a time delay integration TDI detector (Fig. 5, Ref. 508) configured to generate at least one output signal corresponding to at least one image of an object, said TDI detector disposed to receive the focused light directed along the imaging path (See Fig. 5), said TDI detector being inclined at an angle relative to the imaging path (See Fig. 5), so that a plane of the TDI detector is not perpendicular to the imaging path that is incident on a first part of said TDI detector forms an image exhibiting a first focus, while light from the imaging path that is incident on a different part of said TDI detector forms an image exhibiting a different focus (See Fig. 5) (Col. 4-5, lines 54-18).

**Claim 47**

Eismann ('899) discloses a collection lens (See Fig. 5) disposed so that light traveling from the object passes through the collection lens (See Fig. 5) and travels along a collection path, said collection lens substantially collimating light (See Fig. 5) from the object (Fig. 5, Ref. 101); a focusing lens (See Fig. 5) disposed in the collection path to receive light that has passed through the collection lens (See Fig. 5), producing focused light that is directed along an image path (See Fig. 5); and a light sensitive detector (Fig. 5, Ref. 508) disposed to receive the focused light directed along the image path (See Fig. 5), said detector being disposed at an angle relative to focusing lens (See Fig. 5), such that light from the image path that is incident on a first part of said detector exhibits a first focus (See Fig. 5), while light from the image path that is incident on a different part of said detector exhibits a different focus (See Fig. 5) (Col. 4-5, lines 54-18).

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
